

**skill-up**  
 Skilling, Upskilling,  
 Reskilling in the future  
 Air Transport

## NEWSLETTER 05

## KNOWLEDGE CENTRE LAUNCH

The **Knowledge Centre** is an online platform that collects the main results of the project. It provides users with one or more possible training paths, combining the contents developed with the aim of “bridging the gap” between the baseline competencies of the user and the required skills of the specific professional profile.

In the Knowledge Centre, users will have access to different tools to enhance their skills, such as slides, video lessons, and additional materials to explore the topic they choose.

To have access to it, the only thing necessary is to enroll.

**FULL TRAINING PROGRAMME**

Or in the **SPECIFIC MODULES:**

**AIRPORT  
 OPERATORS**

**ATCOs**

**PILOTS**

**RPAS OPERATORS**
