

Knowledge Centre Training Platform

The **Knowledge Centre Training Platform** is an online tool that aims to support the definition of a competence-centered career path for both newcomers and professionals in terms of new careers or a lifelong learning path.

The platform provides users with one or more possible training paths combining the training contents developed, with the aim of “bridging the gap” between the baseline competence/skills profile of the user and the required competencies and skill set of the specific professional profile.

Through the **Knowledge Centre**, users have access to different tools to enhance their skills, such as slides, video lessons, and additional materials to explore the topic they choose.
